

E36 Fog Light Block-Off Cover Set (L&R Pair)

Install Tip:

Though these covers snap into place very quick and easily, we have a tip that helps make sure they are secured much better. This is particularly useful on a track / race car, or any street car where bumps and potholes can jostle them over time, which could cause them to pop out at an inopportune time.

We have found it's wise to add a Zip-Tie at the end of each fog light cover, to ensure these do not loosen over time. This require 4 small Zip-Ties, and making a small hole on each side of the fog light block off covers. Photos below show how we secured these better than the built in tabs.
