NOTES

1 Requires minor modification of the OE steering knuckle

3 For 1995 M3, requires minor modification to the control arm, outboard of the outer ball joint

CALIPER-WHEEL CLEARANCE

DIMENSION A -- When checking for clearance between your wheels and big calipers, wheel offset is not as critical as the spoke design and back-spacing of the spokes. Using Dimension A as a reference, measure from the hub surface to several points along the backside of your spoke. This measurement should exceed the figure in Column A listed in the applications for your vehicle model above. If your dimensions are less than listed in Column A above, you will need a wheel spacer to push the wheel away from the caliper. TMS sells a large variety of spacers, sized 5-30mm. Generally you should have a safety margin of 3mm.

DIMENSION B -- Measure from the middle of the center bore out to place the forward edge of the caliper. This will give you a reference to relate to Dimension A. At this point the caliper should not be touching the spoke.

DIMENSION C -- Measure from the middle of the center bore out by the specified figure in Column C above. This will give you an idea of the total amount of clearance for the entire diameter of the brake kit. It's measured to the rearmost edge of the caliper (back of the caliper) and will be the biggest dimension you will check. You'll probably need a tape measure for this one (1/2 inch = 12.7mm). If the figure in Column C fits within the Inside Diameter of your wheel by a margin of at least 3mm, you're all set! If Column C is larger than your wheel I.D., you'll need a smaller brake kit.

PART NUMBER EXPLANATION

1A4.6003A1

1 Location - 1/front, 2/rear

A Caliper family

4 Disc machining - 0/no disc (caliper only), 1/drilled 2-pc, 2/slotted 2-pc, 4/drilled 1-pc, 5/slotted 1-pc

6003A Kit part number

1 Caliper color - 1/black, 2/red, 3/silver, 4/gold
