

# Shark Injector™

## Dealer Info

Turner Motorsport is the distributor for the Shark Injector in North America. We are always interested in adding new dealers to our program so please feel free to contact someone in our sales department regarding a dealer account.

The Shark Injector was introduced in the late-1990's as an alternative to other OBD-II performance software upgrades. To this day it remains the #1 hand-held, do-it-yourself OBD-II performance software in the world. The Shark Injector allows you and your customers to upgrade and restore a BMW without having to remove the DME from the car and ship it off to a programmer.

### What Does It Do?

The software that gets installed is designed to increase horsepower and torque, provide smoother power delivery, and enhance throttle response. A new (higher rev limit) and elimination of the top speed governor are other features. It has breathed new life into thousands of BMWs over the years and helped with the love affair that owners have with their cars.

### How Does It Work?

The Shark Injector plugs into an existing OBD port on the car and re-flashes the ECU. At the same time a copy of the stock DME's software is recorded allowing the user to switch back to stock programming at any time on the same vehicle. Once it is done installing, the Shark Injector is removed from the car. The only special tools required for its use is a battery charger.

### What Cars Will It Work On?

Currently, there are two versions of the Shark Injector that work on all 6-cylinder BMWs from 1996 to 2003 (up to Feb 2003 production date), including the 2001-05 E46 M3. In addition, there are upgrades for the 2001-2005 MINI Cooper S.

### How To Become A Dealer

Follow the instructions on the next page and fax or e-mail your company's info to us. Someone from Turner Motorsport will be in touch with you on prices and other account information.

If you have ANY further questions on the Shark Injector or on becoming a dealer, please let us know!

## **Info For New Dealers**

Dear Potential Shark Injector™ Dealer,

Turner Motorsport is the North American distributor for the Shark Injector™ and Conforti Performance Chips. We welcome your business and hope to see you as a customer in the near future. Below you will find prices and terms for you as a potential dealer. More information is available and once your account with Turner Motorsport is established we can provide you with a full Dealer packet.

TMS will keep product in stock and ready to ship. We welcome drop ship orders to your customers. You do not have to stock Injectors on the shelf. As the sole distributor, Turner Motorsport will have Shark Injectors on the shelf ready for programming and shipment. This ensures that your customers get full instructions and the most up-to-date programming available. Drop ships will be handled confidentially and considerations can be made to appear like it shipped from you with custom address labels, packing slips, etc. However, stock orders are encouraged as higher volumes improve unit cost.

All injectors will be shipped with comprehensive paperwork and instructions and will be ready for installation. Resellers who stock the Shark Injector™ only have to re-pack and ship each unit.

Credit cards (VISA, MasterCard, and American Express) are the accepted form of payment.

In order for us to set you up as a dealer and give you wholesale pricing, we will need **EACH OF** the following from you:

- Copy of business license
- Copy of business letterhead and/or business card
- Copy of your company's blank service/retail invoice you would use to bill a customer
- Copy of current advertisements and/or listings in phone book or website
- Three (3) trade references in the aftermarket field (company name, phone, contact)

Please fax or e-mail the above information to Turner Motorsport. From there we can set you up as a dealer and get in touch with you on pricing and ordering. We have a full Shark Injector™ Dealer packet to send you as well.

Thanks!
